ERG is pleased to announce our brand new App

Dune Plants

*A guide to plants of the
Indiana Dunes*

Though surrounded by intensive manufacturing activity and crisscrossed by numerous transportation corridors, the Indiana Dunes region harbors a remarkably diverse natural environment. The Dune Plants App from the Beverly Shores Environmental Restoration Group provides a searchable listing of 380 of the most common plants in the area. Detailed views of each plant offer photos, descriptions, and lists of plant characteristics for each plant. Keys make Dune Plants a powerful field guide, helping to identify wildflowers, trees, and ferns of the Indiana Dunes.

Just head to the App Store on your iPhone or iPad, search for Dune Plants, and download your **free** copy. We'd love for you to rate the Dune Plants App. Let us know how you like it.
